Sprays: modelling versus experimentation

UK-Israel Workshop

*Under the auspices of the Office of Science & Technology, UK
British Council, Israel*

**Queens Hotel, Brighton, UK
July 16-18, 2007**

Workshop Theme

To exchange recent developments in mathematical modelling and experimental studies of sprays and related phenomena with the emphasis on practical engineering applications.

Workshop Objectives

- To bring together researchers from Israel and UK working on mathematical modelling and experimental studies of sprays and related phenomena with a view to establishing long term collaboration between Israeli and British research communities, and possible joint projects proposals eligible for funding under EU programmes, including the EU Framework Programme.
- To bring together mathematicians, physicists, chemists and engineers from both countries working on spray modelling and experimental studies and related problems.
- To establish a link between established and young researchers working on sprays and related problems.

Workshop Format

Sessions will be scheduled in the mornings and afternoons, with breaks in the formal program to allow general and small group interactions.

There will be keynote invited lectures, technical presentations and poster sessions. *Please leave your files for the workshop website!*

Everyone invited to participate in the workshop should understand that they will be expected to make contributions throughout the workshop. These contributions may be oral or written, formal or informal, with the goal that every participant contributes positively to the discussions and the success of the workshop. *The photographs will be freely available from the workshop website!*

Countries

Israel, UK

France, Germany, Czech Republic, Estonia

(27 participants)

Universities (Israel and UK)

Ben-Gurion University of the Negev

Israel Institute of Technology (Technion)

Tel Aviv University

University of Brighton

University of Leeds

Keele University

University of Manchester

City University

University College London (UCL)

Swansea University

University of Central Lancashire

Industry

Delphi Diesel Systems Ltd (UK)

Ricardo Prague (Czech Republic)
